

How to Buy Gold & Diamonds from Cameroon

A practical, honest guide for refineries, dealers and serious buyers - safe and lawful, start to finish.

What we supply

Gold as ~923 dore (22K), refined to 999.9 by your accredited refiner abroad. Silver on request. Rough and cut diamonds under the Kimberley Process, verified with you in person. Quoted at the live London / LBMA spot, assayed and documented per lot.

The lawful export channel

Legitimate gold leaves Cameroon through a MINMIDT-authorised export office, declared, with a certificate of origin and assay certificate, the 5% ad valorem tax paid at origin. Diamonds move under the Kimberley Process. No paperwork means it cannot be lawfully exported or imported.

How to verify ANY seller (free, 10 minutes)

- Ask for the export licence and registration numbers - check them with the issuing ministry.
- Price the gold at the live LBMA spot yourself; reject anything far below spot.
- Insist on a live video call from the site with a code word you give on the spot.
- Reverse-image-search their photos and documents.
- Refuse every advance fee; use staged escrow released against documents.
- Confirm the contact channel belongs to the registered company.

Red flags of a scam

Any advance fee/tax/clearance payment; a price far below spot; urgency and a buyer already waiting; only Gmail/WhatsApp with no verifiable registration; refusal of a live video call; payment to a personal account or crypto-only.

The buying process

- Enquiry - product and quantity.
- Live quote + KYC - priced at the live rate; identity and source checks.
- Contract & assay - terms in writing; weight and fineness verified.
- Payment - bank wire to our corporate account or staged escrow; never advance fees.
- Declared, insured export - FOB Douala or CIF, fully declared and insured.
- Refining abroad - your refinery takes ~923 dore to 999.9.
